For the positioning of hydrogen fuel cell technology in the global market: Proton Motor Fuel Cell GmbH strengthens sales and marketing activities

| Manfred Limbrunner becomes Director of new "Governmental Affairs & Communication" department. |

| Jean-Pierre Sevrain appointed as new "Head of Sales and Marketing" with effect from 1 October 2022. |

Puchheim near Munich, September 30, 2022 – Awareness of hydrogen as an energy source of the future is increasing to a considerable extent among the public and industry. The demand for associated technologies such as fuel cells is becoming more concrete. The Ukraine conflict is also accelerating the impulses through consequences for the energy supply. Dr. Faiz Nahab, CEO of the German high-tech company "Proton Motor Fuel Cell GmbH" (www.proton-motor.de), has therefore appointed Manfred Limbrunner, currently "Director Sales and Marketing", to set up and run "Governmental Affairs & Communication" from 1 October 2022 in response to the current situation. As director of the newly founded department, Manfred Limbrunner is also executive board member of the UK parent company "Proton Motor Power Systems plc" (www.protonmotor-powersystems.com), which is quoted on the AIM London stock exchange. The goal for Proton Motor – as an international player since 1998 – is to establish a high global market presence in order to dynamically shape social and political developments. Jean-Pierre Sevrain, who possesses extensive industry-specific sales experience, has been appointed as the new "Head of Sales and Marketing" with effect of 1 October 2022 to take on the responsibility for sales and marketing at Proton Motor.

In addition to the networking and lobbying strategy for the targeted increase in the level of awareness of Proton Motor, Manfred Limbrunner's area of responsibility also includes Business Development and Market Communication. Due to his technical background Mr. Limbrunner will participate in presentations for the investment community (brokers, funds, institutions etc.) when needing to address the technical aspects of the fuel cell technology. Proton Motor announces the appointment of Jean-Pierre Sevrain as its new "Head of Sales and Marketing", effective October 1, 2022. Jean-Pierre Sevrain has a strong industry background. In the last 25 years he has held several international positions (Europe, Asia, US) in sales, product development and project management. Most recently, Mr. Sevrain was responsible as "Head of Sales Europe" at "Hoerbiger Flow Control". In his function at Proton Motor, Jean-Pierre Sevrain reports directly to the CEO, Dr. Faiz Nahab.

About Proton Motor Fuel Cell GmbH (www.proton-motor.de):

For a quarter of a century, Proton Motor Fuel Cell GmbH has been Europe's expert in climate-neutral energy generation with CleanTech innovations and in this field, it has specialised in emission-free hydrogen fuel cells developed and manufactured in-house. The corporate focus is on stationary applications such as emergency power for critical infrastructures and mobility solutions such as back-to-base applications. In addition, the CO₂-balanced customised or standard and hybrid systems are used in the automotive, maritime and rail sectors. Proton Motor's new automated series production plant was inaugurated in September 2019 by the Bavarian Minister of Economic Affairs and Energy.

The internationally active technology market leader from Bavaria, which currently employs more than 100 people under the CEO management of Dr Faiz Nahab, is a wholly owned operating subsidiary of "Proton Motor Power Systems plc", based in England. Since October 2006, the parent company's "Green Energy" share has been listed on the London Stock Exchange with simultaneous trading in Frankfurt/Main (ticker symbol: "PPS" / WKN: A3DAJ9 / ISIN: GB00BP83GZ24).
